

SMART SECURITY SOLUTIONS FOR RETAILERS

Our complete security solutions provide clear image quality, advanced AI video analytics and intuitive video management software to help you improve loss prevention and operational efficiencies in stores, distribution centers, warehouses and corporate offices.

POWERFUL SEARCH

Avigilon Appearance Search™ technology sorts through hours of video with ease to quickly locate a specific person or vehicle across an entire site, helping to improve theft prevention, identify false liability claims and reduce shrinkage.

REAL-TIME NOTIFICATIONS

Next-Generation Video Analytics detect up to 50 objects in a scene, even if they are stationary, providing greater accuracy of alerts for perimeter protection and in crowded environments.

HELP PROTECT WORKERS

Workers that face the risk of aggression or violence can be equipped with **VT100 body-worn cameras** to help deter aggression while also capturing evidential footage.

EASY INTEGRATION

Avigilon solutions are built on an **open platform**, allowing you to leverage previous third-party investments that are ONVIF® compliant. **ACC™** video management software works with your existing access control, intercom, external alarm and POS systems.

EFFICIENT BANDWIDTH MANAGEMENT

Avigilon High Definition Stream Management (HDSM) and **HDSM SmartCodec™** technologies reduce bandwidth and storage needs while maintaining image quality.

SMART ANALYTICS

The **AI NVR** adds patented Avigilon self-learning video analytics and Avigilon Appearance Search technology to almost any IP camera that is connected to ACC software.

AVIGILON CONTROL CENTER (ACC) SOFTWARE

Provides an easy-to-use, AI-enabled user interface that brings the right information to you so that you can take action, helping ensure critical events do not go unnoticed.

AVIGILON CLOUD SERVICES (ACS)

Simplifies access to video security systems for retailers with multiple store locations and distributed security systems, allowing you to access your ACC sites from anywhere via web browser or mobile app.

UNUSUAL ACTIVITY DETECTION (UAD) TECHNOLOGY

Continuously learns what typical activity in a scene looks like and then detects and flags unusual behavior of people and vehicles, enabling you to quickly identify atypical events and filter through hours of videos in minutes.

H5A FISHEYE CAMERA

A cost-effective and easy-to-install solution that provides 360° panoramic views of large areas from a single vantage point and analytics to proactively detect critical events.

H6 MINI DOME CAMERA

Brings an exceptional level of protection to indoor spaces with high-resolution images of up to 5 MP, a wide field of view and efficient bandwidth management in a compact design.

HD VIDEO APPLIANCE

Provides a network switch, workstation, server and storage, all integrated into a single cost-effective, easy-to-install security solution.
