

# SAFETY AND SECURITY FOR PLACES OF WORSHIP

Places of worship often face the task of taking proactive measures to protect their people, property and community. Our complete video security and access control solutions can provide clear image quality, advanced AI video analytics and intuitive video management software to help create a safe worship environment.

## EASE OF USE

Avigilon Control Center (ACC) video management provides an easy way to review live or recorded video with a simplified screen layout and intuitive controls, available on both desktop and the ACC Mobile app

## REAL-TIME NOTIFICATIONS

Self-learning video analytics provides alerts to help you detect people or vehicles in areas of interest and notifies you of events requiring further investigation to help improve response times.

## EASY INTEGRATION AND COST SAVINGS

Integrate your existing cameras and video management software with Avigilon open-platform security solutions, allowing you to save on installation costs and leverage your current security infrastructure.

## SAFETY ACT DESIGNATIONS

Our video security systems have received SAFETY Act Designations from the U.S. Department of Homeland Security (DHS) as a Qualified Anti-Terrorism Technology and our Access Control Manager™ system has received the Developmental Testing and Evaluation Designation.

## MANUFACTURED IN NORTH AMERICA\*

Our solutions are designed, developed and manufactured at our state-of-the-art facilities in the US and Canada and are NDAA-Compliant. This helps to ensure quality control and efficiency throughout the manufacturing process and enables continuous, accelerated innovation.

## UNUSUAL MOTION DETECTION TECHNOLOGY

Continuously learns what typical activity in a scene looks like at the worship site then detects and flags unusual motion, revealing events that may have otherwise been missed.

## H5SL CAMERA LINE

Offers value and versatility that is backed by an industry-leading, five-year warranty and can be easily installed inside the worship site and its perimeters. Flexible design features and various lens options help you meet the unique video security needs of your own house of worship.

## H4 LICENSE PLATE CAPTURE (LPC) CAMERA

Monitor for suspicious activities in parking lots and quickly find captured license plate video for investigations, even if vehicle speeds are up to 100 km/hr (62 mph).

## ACCESS CONTROL MANAGER (ACM) SYSTEM

Secure your house of worship's entry and exit points. In case of an emergency, ACM™-generated door events allow you to create rule-based actions and notifications for quick on-site responses, including immediate site-wide lockdown.
