**ARTHUR MEYER JEWISH
PREPARATORY SCHOOL**
Palm Beach Gardens, FL

Location

Arthur I. Meyer Jewish Preparatory School is a K–8 college preparatory Jewish day school serving the Greater Palm Beach area for more than 40 years. Located on a 14-acre campus in Palm Beach Gardens, the school operates a secure, self-sustained 68,000 square foot facility that is home to Kindergarten, Elementary, and IB Middle School programs.

The campus is thoughtfully designed to foster community and learning, featuring a wide range of spaces including a multi-sport gymnasium, athletic fields, science and research labs, a media production studio, modular flex classrooms, an innovation lab, outdoor gathering spaces, and more.

With students, staff, and community members active across the campus throughout the day, maintaining comprehensive visibility and security across both indoor and outdoor spaces is essential to protecting the school's students and supporting its mission of providing a safe, nurturing environment for every child.

Challenge

As Meyer Prep looked to modernize its campus security, the school recognized that its existing infrastructure had simply run its course. Technology had advanced significantly, and the campus deserved a system that could match its growth, complexity, and commitment to providing a safe environment for every student and staff member.

Upgrading the system required careful planning and creative problem-solving. Several infrastructure considerations across the campus called for a more thoughtful approach than a standard replacement, and finding the right solution meant balancing cost-effectiveness, long-term reliability, and the advanced capabilities that a modern school campus demands. Meyer Prep came to AT&I looking for more than an upgrade — they wanted a security partner who could build something that would truly serve their community for years to come.

Solution

AT&I Systems conducted a thorough site assessment and developed a tailored plan to upgrade the campus surveillance infrastructure using a Motorola Solutions Avigilon platform. Rather than patching what existed, AT&I recommended a smarter approach — replacing outdated cameras with building-mounted multi-sensor cameras that delivered a significant upgrade in image quality, long-term reliability, and AI-powered analytics capable of detecting and flagging unusual or threatening activity in real time.

To ensure complete coverage across the full campus, AT&I deployed a carefully selected mix of multi-sensor cameras, a PTZ camera for automatic tracking of individuals and vehicles at key perimeter areas, and 360-degree fisheye cameras for high-traffic interior zones. Existing cameras that were still in good working condition were integrated into the new Avigilon platform, preserving usable infrastructure while consolidating everything under one centralized, cloud-managed system.

Every camera placement, every technology decision, and every integration was made with one goal in mind — ensuring that the students, staff, and families of Meyer Prep can go about their day knowing their campus is protected by a system that was built specifically for them.

Results

The upgraded system gave Arthur I. Meyer Jewish Preparatory School a modern, reliable surveillance platform with significantly improved coverage across the entire campus. Building-mounted multi-sensor cameras delivered clearer and more dependable visibility in a way that was both cost-effective and built to last — giving the school a meaningful step forward without unnecessary complexity.

Existing cameras that were still performing well were brought onto the new Avigilon platform, allowing the school to maximize its current investment while gaining the benefits of a unified, centralized system. With PTZ tracking at key perimeter areas, full interior and exterior coverage, and AI-driven alerts that notify staff of unusual or suspicious activity in real time, Meyer Prep now has the tools to stay ahead of situations rather than react to them. The result is a scalable, future-ready security system that supports the school's mission of providing a safe, welcoming environment where students can learn, grow, and thrive with confidence.
